## ANSWER SHEET

## WRITING

It goes without saying that there is plenty of advantages of living in a city. While doing a project on advantage of living in a city, I have found a table which has some relevant data which I will comment on.

According to the table, the most popular option is better opportunities for work and study chosen by 36% of surveyed. The second biggest choice is having all modern conveniences (28%). The smallest number of respondents opt for better facilities for sports and art education (7%).

Looking more closely on the table, it can be seen that better roads and infrastructure appeals less than various entertainment and events, because the difference between them is 13 percentages. It might have happened because of the number of adolescents taken part in the survey. Entertainment appeals more to them than quality of the roads. Moreover, nowadays the quality of roads ~~might be~~ in the rural areas might be as good as in a cities that is why the number of respondent chosen roads is less.

Regrettably, some problems can arise with living in a city. Despite better education, there might be a lack of teachers. ~~to solve~~ To solve this problem, teachers should be given bigger salaries and better classes where they can comfortably teach their students.

To conclude, I suppose that living in a city has more pros than cons. In spite of some little issues, it is the best place to live.
