## ANSWER SHEET

I am doing a project on ~~what~~ the major advantages of living in a city. I have found a table with some results of a survey. In this essay I will analyse the data and express my opinion on the subject of the project.

According to the table, the surveyed have chosen "better opportunities for work and study" (36%), followed by "having all the modern necessities-conveniences" (26%). By contrast, the least chosen option is "better facilities for sports and<sup>and</sup> education" with 7%.

It is also worth mentioning that the percentage of those who chose "various entertainment and events" is higher than the number of those who chose "better roads and infrastructure" (22% and 9% respectively). The difference is 13%. I think it is because roads' quality is improving not only in the cities but in villages too.

Analysing the topic, I have outlined one problem that may arise with people moving into big cities. It has become a common thing when citizens treat villagers with rudity and discriminate them because of their former homeplace. The way to solve this problem is to guarantee equal abilities for everyone. For example, prioritize knowledge over birthplace.

In conclusion, I would like to say that life in a big city is much more comfortable, quick and autonomic than the life in a village or by countryside. Personally, I would instantly move in a city if I could.
