ANSWER SHEET

The subject of the project is major advantages of living in a city. I have found some data on the subject, represented as the table with the results of the opinion polls. Respondents were asked about advantages of living in a city.

On the table we can see that two most popular options are better opportunities for work and study, which was chosen by 36% of respondents, and having all the modern conveniences (26%). The least popular advantage is better facilities for sports and art education, only 7% has chosen that option.

For a comparison I have chosen the most and the least popular options. Better opportunities for work and study and better facilities for sports and art education have a 29% difference between them. In my opinion, first one is more important because the main reason people move to a city is to find a better income, a good job or to attend better schools, meanwhile, sports and art are secondary choices in most people's life.

One of the problems that can arise with living in a city is busy roads. That problem is very serious for drivers. Busy roads can be solved by taking a bus or a metro instead of driving your own car. It will not only save your time but also will reduce the pollution.

In my opinion, big city can provide better opportunities in your life than a small city.
