ANSWER SHEET

WRITING

The purpose of this project is to study the major advantages of living in a city. In this report I will comment on the results of the opinion polls on the subject, as well as give my opinion on it.

Firstly, the data shows that the most popular advantage of living in a city is "better opportunities for work and study" (36%), followed by "having all the modern conveniences" (26%), while the least popular advantage is "better facilities for sport and art education" (7%).

Secondly, "better for work and study" (36%) is more popular than "having all the modern conveniences" (26%) by 10%, and was chosen by almost a third of all participants. This indicates that a big part of city residents like there because of the quality of jobs and places to study that city life can provide.

A problem that can arise with living in a city is the constant pollution of air due to the large amount of cars that traverse the city daily. In order to solve this problem, I think the government should prioritize building multiple parks filled with trees to let city residents breathe in fresh air and clear their minds.

In conclusion, while life in a big city has its flaws, I think it is ultimately beneficial because of its convenience and career opportunities.
