ANSWER SHEET

Today I want to introduce my project, on the subject of the major advantages of living in a city. In my opinion, this is a very interesting question. I did a research and found some data about the subject. I think, that living has a lot of advantages and opportunities, but also has a lot of disadvantages.

Here are a few facts and comparisons. 36 percent of people think that the city has better opportunities for work and study, but only seven percent of people think that the city has better facilities for sports and education. Personally, I agree that the city has better opportunities for work and study, but also the cities have better sports and art education facilities.

Also a lot of people stated that a major advantage of living in a city, is having various entertainment and events, but many less, people said that cities have better roads and infrastructure. I agree with these statements, cities indeed have a lot of entertainments and events, they are sometimes very interesting. But some cities have problems with roads and infrastructure.

I think that the main problem of living in a city is health. A lot of people can't stress at work, that causes mental problems. In big cities there is also a big problem with pollution, which can cause illnesses.

We can solve this problem, by building bicycle infrastructure and giving three days of res in a week, instead of two.

In my opinion, living in a big city has a lot of advantages and disadvantages, but I would prefer living in a big city.
