## ANSWER SHEET

Nowadays living in a city is a great subject to discuss. In fact, urban life has a lot of advantages and disadvantages in it, and all the people have different opinions about it. So, let us take a look on the major advantages of living in a city.

According to the results of the opinion polls, twenty-two percent of the respondents find entertainment and events various in the city. In my view, it may refer to the city festivals, holidays and other great events that village life can be lacking of. Next opinion is that there are better roads and infrastructure in the city. At this point, I agree with the nine percent of respondents. Every single city has its infrastructure - schools, kindergartens, hospitals, parks and squares - and usually it is way better than in country side.

Exploring the subject of major advantages of living in a city, it is impossible to ignore the fact of better opportunities in studies. But what exactly these opportunities are? According to the opinions, 36% think that there are better opportunities for work and study. But only 7% of them find facilities in outdoor sports better. Comparing these two statements, I can say that they can outline the problem of lack of these facilities in cities as the difference is huge. I think that that these maybe not as good as people want them to be.

Besides all the opinions discussed, I'd like to describe one of the most dangerous problems that can show up while living in the city - environmental issue. Living in the country side provides you fresh air, water and food but in the city the situation is worse than it seems to be. I suggest the way of solving it by using the bicycle instead of a car and recycling litter.

In conclusion, I'd like to say that urban life has two sides. I personally prefer living in the city because of studies. But the choice is yours depending on your attitude to the urban and village life.
